

Members of the IFIA Government Services Committee provide services of the “Profession” to the public sector and international institutions.

Such services assist governments and facilitate international trade through various processes that check the compliance of imports and exports with regulatory requirements.

Services offered by IFIA Government Services Committee Members may include, but are not limited to the provision of:

- Conformity assessment programmes to ensure that products meet the requirements of technical regulations and standards set by a regulatory authority in the importing country before they are shipped or imported;
- Border control services such as cargo scanning, tracking of goods in transit and security auditing;
- Pre-shipment inspection services, helping governments to protect their import revenues, facilitating trade and minimizing the risk of illegal imports.
